

# Technology transforming street cleansing operations

SmartCity is built to meet your operation's specific needs.

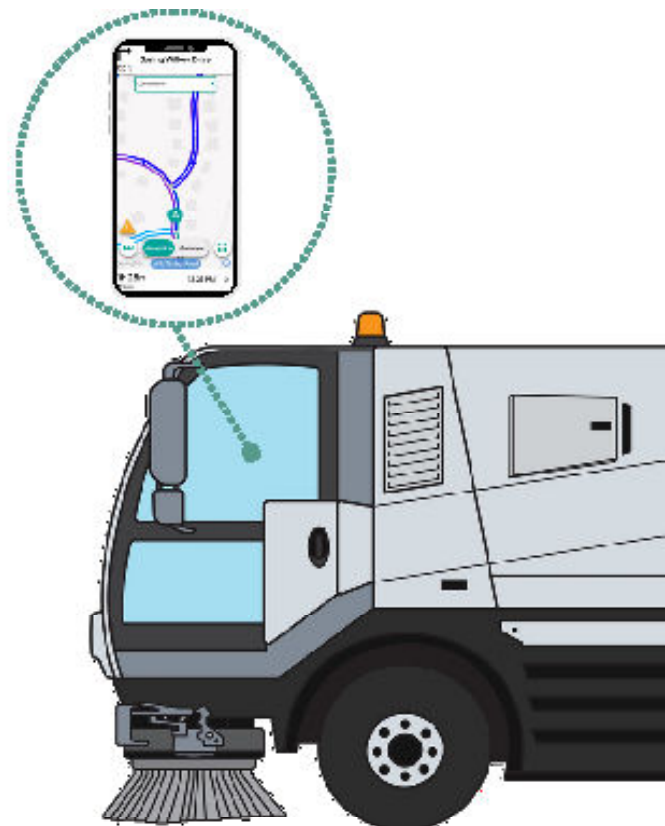

## MANAGER PORTAL

SmartCity's main interface is the Portal, a web-based platform that collects data from supporting software and hardware located in vehicles. The Portal is the operational hub for street cleansing fleets. Managers, supervisors, dispatchers and customer service representatives can perform an array of functions to control their day-to-day operations using data.

## THE DRIVER APP

The Driver App is SmartCity's mobile tool built to meet operator needs when out in the field. Data collected from the Driver app feeds in the Manager Portal in near-real time and serves as key information for supervisors. Key features of the Driver app include digitised route information, service verification, turn by turn navigation and issue logging.

## SmartCity is an all-in-one solution

Digitise all operations

Save on operational costs

Enhance customer service workflows

Verify service automatically

### FEATURES

- Exception flagging
- High density turn-by-turn navigation
- All-in-one camera
- Route planning
- Customised reports
- Pre/post trip inspection reporting
- Material ticket reporting
- Vehicle diagnostics
- Driver performance
- Breadcrumb trails & route playback
- Route optimisation
- Asset management
- Inventory management
- Automatic service verification
- Travel path editing
- Dispatch

### INTEGRATION CAPABILITIES

Routeware uses REST APIs to integrate with the following:

- Telematics providers
- Contact centre systems
- Asset management systems
- Work order management systems
- Geographic Information Systems

### ABOUT ROUTEWARE

Routeware is a leading technology company for the waste and environmental services sector. In the UK, our software and services have been used by over 200 local authorities and most of the leading waste and resource management companies, helping save an estimated £100M+ for UK local government.
